1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

---

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the gripping feature in claims 3, 6, and 9 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2, 4-5, and 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Walker (GB 2233141).

Regarding the above claims, Walker discloses the claimed invention (Fig. 1).

Art Unit: 2837

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

---

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3, 6, and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker in view of Carpenter et al. (1,254,577).

Regarding the above claims, Walker discloses the claimed invention except a gripping feature configured on the planar body.

Carpenter et al. teach a pick having a gripping feature (2) configured on the planar body (1) for providing a gripping surfaces. It would have been obvious to one having ordinary skill in the art to modify Walker's pick as taught by Carpenter et al. to include a gripping feature configured on the planar body for the purpose of providing a gripping surfaces.
